 Well of course its restrictive and useless. I wouldn't expect anything less
 from anygroup that had K6IYK, Jim Fortney, involved with the planning.

Subject: TPK from a floppy drive
To: ham-digital@ucsd.edu

I am looking to contact anyone who has successfully got TPK to run from
a PC using only a floppy drive, not a hard drive.

   The reason is because I am trying to get TPK to run on my Toshiba T1000
laptop which has only a single 720K floppy drive. I have succeeded in
getting the program to start, it behaves oddly. I think it's because I
have left out some important files or something when I made the TPK diskette.

   If you have any suggestions that might help my situation, please let me
know.

   Thank you for taking the time to read this.
